* The number of towns the population of which exceeds 5,000, in the Hubli and Navalgund Talukas, given in this return, does not coincide with that given in Form Nos. VIII. and IX., as the town of Hubli consists of several villages as given in the body of the report, two of which contain more than 5,000 inhabitants and the rest less, and the town of Nargund, in Navalgund Taluka, consists of 5 villages, all of which contain less than 5,000 inhabitants; and these villages have been classified separately in this Return according to their population: hence the discrepancy between these returns.

* These heads are all in the Survey Akar Bund, except the area of Tanks, which must be ascertained from Survey Register of Lands in the possession of every Koolkurnee.
The Area of those Tanks only need be given which form entire Revenue Survey Numbers.

† This sum is that actually received in rent, but it is not the actual assessment. The survey assessment on Government arable land is Rs. 210,940-6-8 but as much of the land was let on lease, before the Survey, at a lower rental than the survey rates, the lower rent is paid until the leases expire. It will be some years before the leases fall in, and the survey assessment can be realized. The amount of revenue temporarily forgiven on this account is Rs. 30,209.

(*a*) Sherole, Alta and Kagal only are wholly surveyed. The areas for others are calculated from the accounts.
(*b*) These Talukas only are wholly surveyed. The areas for others are calculated from the accounts.
(*c*) These Talukas are not surveyed. The areas are calculated from the accounts.
